

11th April 2010

All Parents,

The Road net work around the school building has been recently completed by the RTA. Access to the school's front gates has been provided from the rear of the building through one way road which almost encircles the building and also has ample parking spaces.

Parents generally do not use this access and instead, park their cars on the two-way main road in front of the building. As a result, we have observed increased traffic congestion in front of the main front gates of the school at the times of drop / pick up by the parents who use their own cars for this purpose. This situation has become hazardous for the children and greatly inconvenient for the parents.

We strongly urge all parents who use their own cars for dropping and picking of their wards that in the interest of the security and safety of all children, to kindly use only the proper **ONE WAY** access road by entering from the backside of the school building. The KG children should be dropped only in front of the **Gate No: 01** and all others at **Gate No: 02**.

Please note that the school guards have been instructed not to allow parking of any car on the main road in front of the school gates.

We expect that all parents would cooperate in the best interest of all.

The Management
